AUTOMOTIVE ENGINE PERFORMANCE
INTRODUCTION (I)

Course Syllabus

Course Number: EP101
Instructor: Ron Rader

OCAS Code: Phone Number: 580-327-0344
Course Length: 45 hours
Email: rrader@nwtech.edu
Career Cluster: Transportation
Campus: Alva, OK

Career Pathway: Automotive Service
Program: Automotive Service Technology

Career Major: Automotive Service Technician, Automotive Maintenance Light Repair Technician, Automotive Drivability Technician

Pre-requisite: Automotive Introduction

Course Description: This course will cover the engine system components and the valve train components. Also in this course the student will learn to perform basic engine tune-up operations, such as checking and changing spark plugs, checking emission system, checking and cleaning PVC valve as well as checking and setting ignition timing, remove and replace timing belt and verify correct camshaft timing. Students will learn about the fuel system components, checking and changing the fuel and air filters, checking and setting idle speed and also cover mechanical and electric fuel pumps.

Instructional Philosophy: To provide a training program that is of merit both educationally and ethically while effectively providing the individual learner the opportunities, knowledge and skills necessary to succeed in the workplace as well as life.

Course Goals: Upon successful completion of this course, the student will be able to:

Competencies:
Engine & Components
Checking & changing spark plugs
Checking an emission system
Checking & cleaning a PCV valve
Checking ignition timing
Fuel Systems
Fuel systems: Components
Checking & changing an air filter
Removing & replacing a fuel filter
Checking idle speed
Adjusting & cleaning carburetors
Fuel systems: Mechanical & electrical pumps
Identify hybrid vehicle internal combustion engine service precautions.

Major Course Projects: Students will perform tasks relating to the Automotive Service Industry as per standards identified by the National Automotive Technicians Education Foundation (NATEF). Students will complete repair orders each day and will document completion of competencies on competency profiles tracking individual progress and accomplishment.

Project Outline: Projects will include performing tasks on mock ups, shop vehicles, and live work as student skills progress. These projects will reinforce classroom theory instruction and will require the student to consult industry service information during the course of task

Course Syllabus

Instructional Delivery Plan:
The instruction for this course will be comprised of multiple methods designed to promote and accommodate different learning styles including classroom lecture, classroom demonstrations, shop demonstrations, hands on learning activities, classroom discussion, interactive media, textbook, computer based learning activities, research projects, guest speakers, student presentations, and interactive learning with CPS (Classroom Performance System). Students will be required to practice the skills associated with the instructional content and will be required to work independently and also in teams. Assignments will require students to use academic skills in math, science, and language arts.

Assessment Plan:
Students will be assessed according to three basic kinds of learning. Knowledge: Does the student possess the required knowledge to perform a specific competency? Skills: Does the student possess the necessary coordination to perform the task/competency? Attitude: Will the student perform the task/competency on the job after learning to do it? Students will also be assessed according to the basic work skills of attendance and promptness. Soft skills will be assessed in the Academic Career Center.

<thead>
<tr>
<th>Percentage</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>50%</td>
<td>Daily work- Performance of technical skills on job, work habits, safety, clean-up, participation</td>
</tr>
<tr>
<td>50%</td>
<td>Written assignment- Repair orders, textbook assignments, etc.</td>
</tr>
</tbody>
</table>

Grading Scale:
A  90-100  Exceeds expectations
B  80-89   Meets industry standards and expectations
C  70-79   Passing grade, but does not meet some standards
D  60-69   Passing, but only meets the minimum standards
F  Below 60 Failing, does not meet minimum standards

Alliance Credit Offered: OSU Okmulgee

Industry Alignments: ASE Certification, ODCTE Certification,

End of Instruction Industry Assessment: ASE Certification, ODCTE Certification,

Resources:
Automotive Excellence Vol. 1 and Vol. 2
Modern Automotive Technology
Introduction to Automotive Service: Fundamental Concepts
CDX Global Interactive Training
